OCTOBER 2022

UPDATES

THE KING SCHOOL WAY

In September, students and teachers worked to build relationships and practice expectations. As we move through October and beyond, students will be expected to follow the King School Way and teachers will follow their posted menu of corrections as needed based on student choices and behavior.

KING LABS

Beginning in October, all students at King will participate in community building activities called "Labs." Students will be intermingled with various grade-level peers and staff members to create additional connections and relationships outside of the classroom. October's Labs will include "get to know you" activities.
